## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a headset, which controls the position of a cursor marker, with a microphone, which allows commands to be spoken to the computer wirelessly, classified in class 345, subclass 158.
- II. Claims 18-25, drawn to a finger controlled mouse, classified in class 345, subclass 166.

The inventions are distinct, each from the other because:

Inventions of group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I of a headset, which controls the position of a cursor marker, with a microphone, which allows commands to be spoken to the computer wirelessly, which does not operate with a finger controlled mouse by group II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
